Carbon oxides and other irritant/toxic gases and fumes.

Suitable and unsuitable extinguishing media

In case of fire: Use carbon dioxide, chemical powder agent and appropriate foam to extinguish surrounding products.

Special protective equipment and precautions for fire-fighters

During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

### Section 6. Accidental release measures

3063-1

#### Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

#### Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

### Section 7. Handling and storage

#### Precautions for safe handling

#### Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Do not breathe dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

#### Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

### Section 8. Exposure controls/Personal protection

**Control parameters (biological limit values or exposure limit values and source of those values)** Exposure limits: Dust – PEL-TWA 15 mg/m<sup>3</sup> (total dust) & 5 mg/m<sup>3</sup> (respirable fraction);

#### **Appropriate engineering controls**

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

#### Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. We recommend wearing chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact during all handling operations. We recommend wearing protective chemical splash goggles/safety glasses or other to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

### Section 9. Physical and chemical properties

Appearance, physical state/colour Liquid white Odour Odourless Odour threshold Not available	Vapour pressureNot availableVapour densityNot availableRelative densityNot available
pH Not available	Solubility Soluble
Melting/freezing point 0°C (32 F)	Partition coefficient - n-octanol/water Not available
Initial boiling point/range 100°C (212 F)	Auto-ignition temperature Not available
Flash point > 93°C (199 F)	Decomposition temperature Not available
Evaporation rate Not available	Viscosity Not available
Flammability (solids and gases) Not available	VOC 0 g/L
Upper and lower flammability/explosive limits Not available	Other None known

#### Section 10. Stability and reactivity

### Reactivity

Does not react under the recommended storage and handling conditions prescribed.

### **Chemical stability**

Stable under the recommended storage and handling conditions prescribed.

Possibility of hazardous reactions None known

Conditions to avoid (static discharge, shock or vibration) None known

# Incompatible materials

# None known

### Hazardous decomposition products None known

### Section 11. Toxicological information

Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact) Mild transient skin/eye irritant.

Symptoms related to the physical, chemical and toxicological characteristics Skin irritation, redness, stinging, pain; Eye irritation, redness, tearing;

### Delayed and immediate effects (chronic effects from short-term and long-term exposure)

Skin Sensitization – No data available; Respiratory Sensitization – No data available; Germ Cell Mutagenicity – No data available; Carcinogenicity – No ingredient listed by IARC, ACGIH, NTP or OSHA; Reproductive Toxicity – No data available; Specific Target Organ Toxicity — Single Exposure – No data available; Specific Target Organ Toxicity — Repeated Exposure – No data available; Aspiration Hazard – No data available; Health Hazards Not Otherwise Classified – No data available.

### Numerical measures of toxicity (ATE; LD<sub>50</sub> & LC<sub>50</sub>)

CAS 124-17-4 LD<sub>50</sub> Oral - Rat - 6500 mg/kg; LC<sub>50</sub> Inhalation - Rat - 4 h - 72500 mg/m<sup>3</sup>; LD<sub>50</sub> Dermal - Rabbit - 14500 mg/kg;

ATE not available in this document. Section 12. Ecological information

Ecotoxicity (aquatic and terrestrial information) No data available for this product

Persistence and degradability No data available

Bioaccumulative potential No data available

Mobility in soil No data available

Other adverse effects No data available

## Section 13. Disposal considerations

Information on safe handling for disposal/methods of disposal/contaminated packaging Dispose of contents/container into safe container in accordance with local, regional or national regulations.

### Section 14. Transport information

I number; Proper shipping name; Class(es); Packing group (PG) of the TDG Regulations t regulated
l number; Proper shipping name; Class(es); Packing group (PG) of the 49 CFR (USA) t regulated
I number; Proper shipping name; Class(es); Packing group (PG) of the IMDG (maritime) It regulated
I number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air) It regulated
ecial precautions (transport/conveyance) None
vironmental hazards (IMDG or other) None
Ik transport (usually more than 450 L in capacity) Possible
ction 15. Regulatory information
fety/health Canadian regulations specifics Refer to Section 2 for the appropriate classification. This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations (HPR).
vice mental Canadian regulations encodies

### Safety/health/environmental outside regulations specifics

United States OSHA information: This product is regulated according to OSHA (29 CFR). United States EPA (Environmental Protection Agency) information: 40 CFR Refer to the ingredients listed in Section 3 & Sections 12; 13 & 14. United States TCSA information: Refer to the ingredients listed in Section 3. National Fire Protection Association (NFPA): HEALTH: 0 FLAMMABILITY: 1 INSTABILITY: 0 SPECIAL HAZARDS: Refer to Section 2 & 3. HAZARD SCALE: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe Proposition 65: This product may contain traces of Silica-crystalline, Quartz known to the State of California to cause cancer or other reproductive harm.
