

ADBOND 8388-1
Sprayable neoprene base contact adhesive**DESCRIPTION**

ADBOND 8388-1 is a fast setting sprayable neoprene rubber base contact adhesive. It adheres very well on laminate, particle board, plywood as well as mdf. It can be used for wood veneer with backer protector. Wait 24 hours before applying lacquer. The first pass of lacquer will have to be sprayed in a thin layer in order to avoid too much solvent which could impair the adhesion of Adbond 8388-1. Consult your technical representative for more information. Adbond 8388-1 can also be used for bonding clean sheet metal to plywood.

Adbond 8388-1 cannot be applied by roller or brush.
