

ADSEAL BACKER ROD SR-2600
SOFT TYPE BACKER ROD**DESCRIPTION**

ADSEAL BACKER ROD SR-2600 is a soft, non-gassing, pliable, bi-cellular backup material for construction joints and application that require sealants. It performs as depth control for ADSEAL hybrid and silicone sealants and also helps the sealant to assume the optimum hour-glass shape. Sealants will not adhere to it; no bond breaker is required.

COMPOSITION AND MATERIALS

ADSEAL BACKER ROD SR-2600 is a round grey, extruded bi-cellular polyethylene backer rod with a water-resistant outer skin. It is compatible with cold applied sealants ADSEAL silicone, hybrid, polyurethane or latex acrylic

SPECIFIC USES

Especially suited for applications with irregular and varying joint widths where standard closed cell backer rods are not appropriate and where bubbling concerns are critical. May also be used in place of standard closed-cell backer rod in most applications. Common applications include expansion and contraction joints, window glazing, curtain wall construction partitions, parking decks, bridge and highway construction pavement maintenance and log home chinking.

INSTALLATION

Joint or opening must be free of all contaminants (including curing compounds and form-release agents), loose materials, dry and free of frost. Install between 25%-50% compression. With a blunt instrument or roller, seat the ADSEAL BACKER ROD SR-2600 to depth recommended by Adfast.

LIMITATIONS

Do not use with hot applied sealants. Sealant compatibility should be confirmed by Adfast. ADSEAL BACKER ROD SR-2600 should be installed with a roller or flat-sided tools. Avoid puncturing stretching and over compression. Temperature limits: -90°F to 190°F (-67°C to 87°C).
