

ADBOND 3091HV
Acrylic pressure sensitive emulsion adhesive**DESCRIPTION**

ADBOND 3091HV is a pressure sensitive acrylic emulsion adhesive designed for lamination or pre-glued applications. Due to its pressure sensitive system, the adhesive remains sticky for any long period if protected by a release paper. ADBOND 3091HV adheres very well to wood, paper, fabrics, cardboard, polyurethane foams, expanded polystyrene (EPS) and some plastics.

PHYSICAL PROPERTIES

Color	Wet - White Dry - Transparent
Viscosity	40000 - 45000 (cP)
pH	7.5 - 8.5
Solids	58 - 60 (%)

APPLICATION

ADBOND 3091HV can be applied using compressible bottle, roller or mechanical roller. For application with a mechanical roller apply a wet film of 9-14 mils (24). Drying can be accelerated with heat / moisture extraction. Consult our technical department for more information.

SUGGESTED USE

- Lamination
- Pre-glued (with release paper)
- Tape

STORAGE

Protect from freezing. Keep in a hermetic closed container to avoid any contamination.

PACKAGING

- 20 liters/pail
- 200 liters/drum
- 3000 liters tote tank
